## CPD Overview

---

---

## Available CPD Material (4)

---

### Specifying Construction and Façade Sealants

This short CPD course available in person or via webinar, will assist specifiers in creating the most robust sustainable, building envelope and protect structures from water ingress.

Key topics include; sealants and why we use them, façade and pedestrian walkway seals, correct application of a sealant and the critical importance of movement accommodation. In addition sealant legislation and standards are discussed and the content will provide detail on choosing the right sealant.

Finally clear guidance on how to easily access important primary evidence is provided.

By the end of the CPD you should have a greater understanding of:

- The importance of correct expansion joint dimensions.
- The correct legislation for façade and pedestrian walkway sealants.
- The different performances available within the standards.
- Where to access relevant certification on Bostik products.
- Differing sealant technologies including silicone, hybrid and polyurethanes.

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

---

Multiple formats

### Sub-floor Preparation for the Installation of Resilient and Textile Flooring

The objective of this seminar is to understand the requirements to achieve a trouble free installation of a chosen resilient or textile floor covering. You will learn about typical substrates, moisture measurement and techniques, moisture mitigation, sub-floor preparation techniques and products and finally adhesive selection to install floor coverings successfully and avoid costly errors.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

---

### Specifying Products to Combat Moisture in Sub Floors

This seminar will provide information on:

- Industry codes of practice
- Responsibilities
- Assessment and testing
- New build projects
- Refurbishment projects
- Product requirements
- Specifications

Material type: Seminar

RIBA Core Curriculum: **Legal, regulatory and statutory compliance**

Knowledge level: General Awareness

---

### Specifying Sanitary Sealants

This short course available in person or via webinar will assist specifiers in ensuring high quality sanitary sealants are used, reducing the likelihood of mould growth and leakage.

Key topics include; sealants and why we use them, mould growth and correct application of a sealant. In addition sealant legislation and standards are discussed and the content will provide detail on choosing the right sealant.

By the end of this CPD seminar, delegates should be able to:

1. Reduce the likelihood of mould development by design.
2. Acknowledge the correct legislation for sanitary sealants.
3. Understand the different performances available within the standard.
4. Understand the best sealant shape for sanitary sealants.
5. Differentiate between sealant technologies including acetoxy silicone, neutral silicone and hybrids.

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

## Classifications

---

### Subject/Product Areas (CI/SfB)

Substructure

Floor beds, ground floors, basements > Tanking, guniting, grouts

Finishes

Floor finishes: finishes, accessories > Flooring adhesives, bonds, grouts

Floor finishes: jointless > Resin-based flooring

General products

Paints, varnishes, protective treatments etc. > Special paints, coatings, films

### RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *General Awareness*

Legal, regulatory and statutory compliance

Knowledge level: *General Awareness*
